

FAQs

Q. What kind of results can I expect?

A. The average session involves 6-12 treatments spaced over 1-4 weeks intervals. Maintenance treatments may be required to keep the results.

Q. Is the treatment safe?

A. Clinical trials have confirmed that the VermaDerm and RF technologies safely and effectively reduce unwanted fat, without any side-effects.

Q. How soon can I return to my daily routine?

A. There is absolutely no downtime with the facial contouring treatment and you can immediately return to your daily activities. You can also have the treatment during your lunchtime break and go back to work with improved contoured face.

Q. Does the treatment hurt?

A. You will feel your skin warming up, but this is not painful. Many patients have reported that it feels like a warm massage.

Why should you choose facial contouring with SharpLight

- ▶ Multiple technology treatment
- ▶ Reduces localized fat
- ▶ Tightens lax skin
- ▶ Highly effective with minimal treatments
- ▶ Non-invasive and safe with no downtime
- ▶ Comfortable and pain-free treatment
- ▶ Treatment of double chin, jowls, neck and more.

What our Practitioners are Saying:

What our Patients are Saying:

“ I had a double chin and I hated it. I really wanted to get rid of it, but was afraid of invasive surgery. Luckily my physician recommended the SharpLight treatments. In just a few sessions my double chin was gone and I have been smiling ever since. ”

Julia Reisman - SharpLight Patient

“ After I learned that celebrities frequently have Radio frequency and Infrared treatments to contour their face, I decided to give it a try. The results have been fantastic. I feel like a star myself! ”

Jessica Klint - SharpLight Patient

Dr. Lisa Kellett
M.D., F.R.C.P.(C), D.A.B.D

“ Unlike other devices which have single modality treatment platforms, SharpLight's platforms enables physicians to utilize multiple stacked modalities in one system, and in turn, allowing patients to see faster results in less time. ”

No knife, no pain!

If your face has changed, and you are conscious about the fact that you have a double chin or jowls, now there is a completely non-invasive solution that can help you restore the original contours of your face.

SharpLight's treatment is highly effective and painless. In just a few treatments, you can get rid of the unwanted fat deposits and tighten lax facial skin. You will notice a more youthful appearance to your skin.

How does facial contouring work?

SharpLight's facial contouring treatments perform two actions simultaneously - fat reduction and skin tightening. The treatment uses two advanced technologies - VermaDerm™, and Radio frequency.

Each technology emits energy at a certain frequency. The wavelengths target the water in fatty pockets beneath the skin and heat them. The heat causes the fat deposits to significantly shrink in size. The released fat is then absorbed by the body's lymphatic system and naturally cleared away.

In parallel, the heat causes the collagen fibers in the skin to contract, resulting in immediate skin tightening. The heat also stimulates the body to produce new collagen which restores the skin's firmness and elasticity for long term results.
